

NUCLEAR CLIMATE CAMP

LAPLAND, JULY 20-26TH, 2009

A global nuclear offensive is underway and Scandinavia seems to have been made into the international nuclear industry's testing lab and leading example. Seeing this threat, people from different places and countries have started coming together to resist it. We won't allow the area controlled by Finnish government to become a paradise of nuclear industry!

Workshops, action, training and networking about nuclear topics and climate change are awaiting you at the *Nucleare Climate Camp* in the beautiful Lapland countryside.
