

# STOP NUCLEAR POWER. Join the NUCLEAR Baltic SEA Info TOUR! SUMMER 2010

The Baltic Sea is one of the most radioactively polluted water bodies in the world - thus we think it is important to inform about nuclear power and its risks. The idea is to arrange an infotour around the Baltic Sea in summer 2010. That way we want to come in contact with local initiatives, carry out actions, take part in information events and organize some of those events ourselves, have network meetings with local activists, spread information about nuclear issues and maybe other topics, too.

★ Greifswald  
26.7.-28.7. ★

★ 21.7.-23.7. Jezioro  
Zarnowieckie ★

★ Malmö 3.8.-5.8.  
★ Copenhagen 30.7.-1.8.
